

Incorporated in 2009, Athena Sciences Corporation is a U.S.-based small business that provides technical services and solutions to commercial and government clients. Our biometrics core competencies are grounded in expert-level knowledge of systems, technology, and operations. We are also a Center for Identification Technology Research (CITeR) industry affiliate.

PRODUCTS and R&D

Aegis – Open architecture ABIS ecosystem

Themis™ – Multi-modal biometrics examination workstation

ScanPass™ – Android passport chip reader for identity verification

NATIONAL BIOMETRICS SYSTEMS

Partner Nation ABIS – Architect, design/build/deploy, performance analysis, biometric collection kit design

U.S. DHS – HART design/develop/test, data migration (Peraton, GDIT)

U.S. DoD ABIS – Software architect, optimize matching, systems operation

PROFESSIONAL SERVICES

- ABIS system design, development, and integration
- Fixed and mobile biometrics technology integration
- High availability system operations
- Matching technology analysis and tuning
- Standards Development
- System interfaces (FBI NGI, DoD ABIS, DHS HART)
- System testing (transaction modeling, performance testing)
- Technology assessment and selection

TRUSTED

Servicing DoD ABIS for 9+ years. (2013)

INNOVATIVE

Awarded DoD Phase I SBIR for “Every Camera a Biometric Checkpoint” topic. (2020)

COST-EFFECTIVE

Developed collection kits for in-field mission, priced \$25K. (2019)
